cut meeting of the Republicans called to assemble at Fireman's Hall for the purpose of making out a nomination for township officers, will assemble at Tem plars' Hall, over the store of STEPHEN HALL. It is hoped that every live republican will be present, as a prestige of the vote to be given on Monday next.

LEGIURE - MECHANICAL PHISIOLOGY .- OUR citizens will bear in mind the lecture of the Rev. R. H. Conglin, at Smith's Hall, Friday evening-present week. The relations of the subject to education, and the training of the young, will be dwelt upon, and made practical to every day life. It is said upon good authority, that "we are fearfully and wonderfully made," and if this is true, a skillful handling of the subject can't be devoid of interest. We understand that helps, in the way of illustrations, will be used to give additional interest to the treatment of the subject.

If stormy the lecture will be given next week Priday evening.

THE CONCERTS given at Smith's Hall by the Misses Juvinelia and Celestia on Friday and Saturday evenings, fully realized the expectations of fair audiences. Their selections are in good taste, and their execution evince not only rare natural gifts, but much cultivation. Evidences of satisfaction follow them everywhere, and leave no doubt as to the appreciation in which they are held.

CLOSING OF THE WINTER TERM OF THE PUB-Lic Schools. - The winter term closes pext wrok, and the examinations and public exercises will begin with the primary schools on Wednesday, occupying the morning, and continuing in their order with the same length of time from day to day until Friday, the whole of which will be occupied with the high school. The public and patrons of the schools are invited to

THE SPRING ELECTIONS. - Monday, April 1st, is the day provided by statute for holding village and towhship elections in Ohio. We trust our republican friends in the various townships in this county are not unmindful of the occasion, but will see to it that straight-out Republican tickets are nominated, so far us it is possible. These elections are specially important at this time, when it is claimed by the opposition that the Republican party is disorganized and apathetic. Remember that any falling off in our majorities will be claimed as a Democratic triumph. Immediate attention should be given to the matter, and special care taken in every part of the county that good and true men are selected as candidates by the republicans, and all honorable means employed for their election. It is always important to secure Republican devolves the responsibility of presiding at the full elections.

- SAUR OF THE TOWN HALL .- The voters of the township will be called upon on Monday next to decide upon the question of selling the town hall in East Village, involving the question, of building a suitable one on the west side at some future time, and the holding of all the elections on this side, rather than alternately on both sides as now. From the information that we have been able to gather, there is little difference of sentiment upon the question of doing the voting altogether on this side, as our East village friends say that their business usually brings them over here, even when the voting is done upon that side, and they have no feeling or advantage in favor of the present system. The only point of difference we have heard raised is that of building-that the expense may make a tax necessary, and therefore impose a burden upon the people. We appreciate this objection, particularly in these hard times, and so do the property holders and capitalists on this side, who assure us that they could not be Induced now to favor such a step. We do not think any uneasiness need be occasioned on this score. We understand that our friends on the east side are deficient in school accommodations, and that they would be glad to meet this deficleacy by a purchase of the building in question All the trustees contemplate, is to get permission to sell, and take advantage of the present opportunity to do so. This would seem to be politic and prudent. East village would be accommodated, and the township would suffer little or no sacrifice.

As to the matter of building, we do not understand that the idea enters into present plans, the Medina Herald, has established a new but that such a step is looked forward to when the voters of the township and the signs of the times are favorable, is not to be denied. But when that comes, the borough, no doubt, will make common cause with the township, and so describe the Dixie, whose praise is growing uniarrange as to secure accommodation for both or- versal ; ganizations in the same building, by selling their present building, by the avails of which and the town hall, a fund nearly or quite sufficient could be realized to meet the expenses of erecting the new building. Considerations of economy, and s pradent regard for the growing wants of the place would suggest this. Until this could be brought about by the spontaneous consent of all the parties interested, the borough hall could be used as heretofore, and no interruption of present accommodation would be realized. In this view of the case, which we believe to be a | do ? fair one, no section or class of voters will, we think, raise any opposition. Voters will notice the mode of inscribing

A brief visamong the oil wells of Meeca last week, impressed us with the very idea here given. There meet evinces a keenness for speculation. That is their first idea. You can't ask a question, but that the answer indicates this fact. And what are the evidences of an active business in oil ? In our travels we did not see a single vat discharging. All the oil we met on the road discharging. I have long been familiar with Worcester's Dictionary, and have lees highly gratified at the appearance of the new and beautiful edition of this valuable work. Its vast vocabulary, the skill of its armigement, accuracy of orthography, precision of definitions, particularly of technical and scientific terms, its ceneral completeness, and its freedom from political or sectional bias, render it, is my estimation, the many perfect and authoritative expenience of the English language. It gives no pleasure to state that it is the standard authority for the public printing. Yery respectfully, John HEART, Superintendent.
